An Assignment Template

Tsoi ChiuYuen

September 21, 2015

In this program i will show you how can do it.

Figure 1: This is a margin figure. Here can solve the problem.

COMMAND LINE STUFF

This is how you can represent things you are entering into the command line terminal. Note the use of the dollar sign like the terminal has.

```
$ git pull -u origin master
```

This is the different way to do this program.

REPRESENTING PYTHON CODE IN YOUR ASSIGNMENT

```
a=10
b="Composite"

for x in range(2,a):
    if a%x==1:
        b="Prime"
        else:
print "the number is "+b
```

Here you can comment on your python code.

```
the number is composite
```

This indicates the output of your program.
